Footnotes 2, 3, 4, 5, 6 are continued on next page

2: CE: (European Economic Area) Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, England (UK), Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, The Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Andorra, Georgia, Gibraltar, Maldives, Monaco, San Marino, Sao Tome & Principe, Seychelles, Vatican City, Guadeloupe, Martinique, French Guiana, Reunion Faroe Islands, Greenland, Guernsey, Jersey, Isle of Man, Montserrat

Sales into the EU must be made through an authorized European distributor to meet WEEE Directive compliance requirements.

3: UAE, Saudi Arabia, Bahrain, Qatar, Kuwait

4: The only difference between -UK and -EU is the line cord that comes with the power supply on AER31x0 and AER2100.

5: Power supply includes clips for -US, -EU, -UK, -AU

6: Comes with a direct wire GPIO cable for vehicle installations (AC adapter can be purchased separately)

India - All SKUs

Both North America and Rest of World SKUs do not require certification for sale and can be sold into India

There are four main types of certifications to consider:

1) Regulatory/Legal (required)

Regulatory certifications include FCC, IC and CE which provide legal standing to sell a device into the USA, Canada and the European Economic Area respectively. Some countries may not have their own regulatory bodies and will accept FCC or CE mark. Sales into the EU must be made through an authorized European distributor to meet WEEE Directive compliance requirements.

2) Cellular Industry Certification (sometimes required)

Cellular certifications include PTCRB and GCF-CC. These certifications mean the devices properly connects to UMTS/HSPA+ & EDGE/GPRS/GSM networks. USA and Canada uses PTCRB, EU uses GCF-CC.

3) Carrier (usually not required)

Carrier (or operators) certifications are commonly required in the USA and requested in Canada but are rarely required in other countries/regions. If required, additional operator-specific certifications may be pursued on a business priority basis. Legally, the devices may be activated on carriers without any additional certification.

4) Industry standards (not required)

Cradlepoint devices have received WiFi Alliance certification (if applicable) and are RoHS and RoHS-2 compliant. Some products also have additional certifications such as SAE or MIL-810G for shock and vibration or UL for safety.

WiFi Channels Note: Cradlepoint products with a -INTL and -EU/-UK SKUs include a special build of code that enables and disables WiFi channels to comply with EU law. The -INTL and -EU SKUs are not legal to use in North America (USA, Canada). The -INTL, -EU and -UK SKUs are required for use in Europe for products with 5GHz WiFi (AER products, IBR1100). For enabled and disabled channels by geography: http://en.wikipedia.org/wiki/List_of_WLAN_channels

Country Certifications: Legally, we know the following certifications cover the following countries. Some additional countries may accept one or more of these certifications as well but may not officially be part of their governing body:

FCC: 50 States, Guam, Puerto Rico, Virgin Islands. Plus: Anguilla, American Samoa, Cayman Islands, Federated States of Micronesia, Marshall Islands, Northern Mariana Islands, Palau

IC: Canada, provinces

CE: (European Economic Area) Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, England (UK), Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, The Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland

Plus: Andorra, Georgia, Gibraltar, Maldives, Monaco, San Marino, Sao Tome & Principe, Seychelles, Vatican City, Guadeloupe, Martinique, French Guiana, Reunion Faroe Islands, Greenland, Guernsey, Jersey, Isle of Man, Montserrat

India: Cradlepoint devices are not within the scope of India's new certification scheme and can be freely imported

Certification definitions:

- FCC: Federal Communications Commission
- IC: Industry Canada
- CE Marking: European Community Marking
- PTCRB: certification forum by North American cellular operators
- GCF-CC: Global Certification Forum Conformance Certification Criteria
- WiFi Alliance: trade association
- RoHS: Restriction of Hazardous Substances Directive

See cradlepoint.com/product-certifications for product specific certifications and certificate downloads.

Discontinued products:
