First Responders Trust Cradlepoint

Public Safety Organizations Across the U.S. Leverage Cradlepoint Solutions to Remain Connected to LTE Wireless Networks

Whether in the field or in the station, first responders need to remain connected at all times. Cradlepoint’s cloud-managed LTE solutions are used by first responder and secondary responder agencies in every state. These solutions provide mission-critical data networks for vehicles, mobile command centers, surveillance cameras, incident response teams, body-worn devices, and more.

“With a Cradlepoint router secured in each trunk, officers know that when they get into their cruiser, they will be connected — end of story.” —Sharon Jensen, IT Manager of Planning and Analysis, Boise Police Department

EMS teams in 44 states use Cradlepoint solutions for network connectivity.

Cradlepoint’s Public Safety Customers

- The three largest public transportation agencies in the U.S. use Cradlepoint solutions.
- The largest public bus authority in the U.S. uses Cradlepoint to serve more than 700M riders a year.
