## Ruggedized LTE Router for In-Vehicle

The Cradlepoint COR IBR900 Series router offers a ruggedized 3G/4G/LTE networking platform designed to provide connectivity across a wide range of in-vehicle and mobile applications, including police and first responders, service and delivery vans, taxi and limo fleets, and more.

With an embedded 600 Mbps modem for LTE Advanced, optional second modem, and Wave 2 dual-band, dual concurrent Gigabit WiFi, the IBR900 Series routers provide reliable 24x7 connectivity for both employees and devices, both inside and outside the vehicle.

Secure connectivity is provided by the zone-based object firewall native in NetCloud OS, and by optional CP Secure Threat Management for IPS/IDS. In addition, NetCloud Perimeter can provide a perimeter-secured overlay network for securely connecting in-vehicle IoT devices.

Cradlepoint COR IBR900 Series routers are sold in NetCloud Solution Packages for mobile networking applications.
